COMPACT NEPHROSCOPE

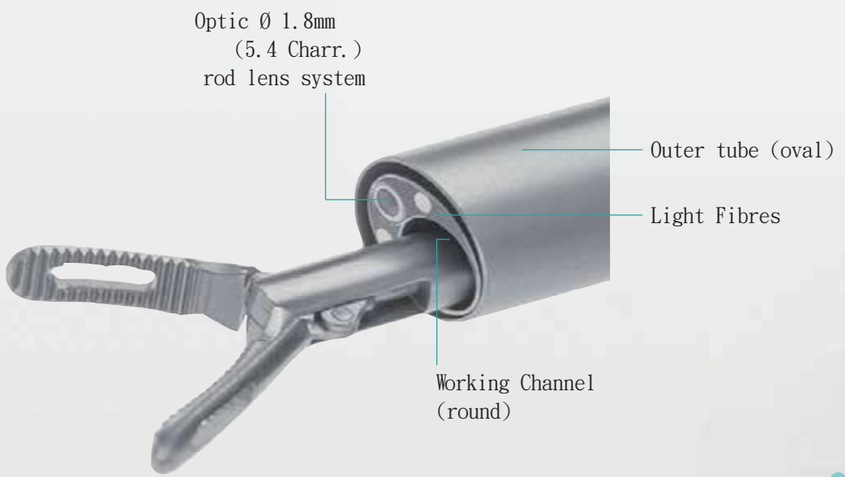
With the new Compact Nephroscope, we meet your demand and your requirement by offering you the following:

- a delicate sheath but with the advantage of a robust design
- an oval outer tube but with a round working channel
- a new Ø 1.8mm (5.4 Charr.) rod lens system to achieve finest image quality
- By using our
  - continuous-flow-system
  - swivel irrigation ring on the sheath and
  - the automatic valve,

  we introduce you to our user-friendly instruments.
- Extended working length (220mm) to be used in bariatric surger
- The direction of view of 15° or 30° allows you a field of view of 80°.
- We ensure the use of our common standard instruments in connection with our Compact Nephroscope up to 12 Charr. / Ø 4.0mm. For example, you can use: ultrasound probes, lithoclast, electrohydraulic litho-tripsy and mechanical instruments.



220mm working length, 80° field of view
